

# Smart Board Lesson Plan Layout

1. List the core content standard 4.0 for your subject area from the [Michigan Department of Education](#)
2. Come up with an idea for the lesson. I get ideas from the Internet... here are some links to other lesson plans: [teachnet](#) [eduscapes](#) [smarttech](#)
3. Think of theme, color and design. You can use templates to make this easier, check out this link to learn more: [templates design lessons and templates](#)
4. What will engage students? I like lesson plans with content pages, followed by video links to reinforce understanding and then hands-on activities to make it all click! Here are some sites with great hands-on activities and video links: [discovery streaming video](#) [learner](#) [pbs](#) [bbc](#) [explorelarning](#)
5. What will be the time limit? This is up to you, you can always stay in the multimedia room and use the board as a giant chalkboard! (A chalkboard you can add pictures and movies to! No more bad drawings!)
6. Do you need hyper links and sound links? It is very easy to add links to Internet activities and movie or sound clips. Add them to Powerpoints, Word documents or Smart Notebook files! Just use the insert tab and type or cut and paste in your link!
7. Do you want animation? You can easily add animation to your presentation, here are some sites to get ideas from! [animations](#)
8. Do you want a work sheet? Add a worksheet for additional reinforcement. Create your own or download one from the 'net!
9. Do you want a test or a quiz at the end of the lesson? You can use free software called Hot Potatoes to create quizzes online! [hotpotatoes](#)
10. Do you want students involved in the Smart lesson? Don't forget to get your students involved... have them come up and diagram a sentence or label a picture! Use the Smartboard just like any other board!
